(54) CROSSTALK PREVENTION CIRCUIT

(57)Abstract:

PURPOSE: To prevent crosstalk between input signals caused in a changeover circuit used to select plural kinds of different analog signals as signal sources such as a video signal and an audio signal.

CONSTITUTION: Power from a power supply B21 to each of signal processing circuits 24-26 for input signals A, B, C is supplied only to the processing circuit selected by a 1st changeover circuit 27 for the substantial signal changeover and the power for the other signal processing circuits is interrupted. A 2nd changeover circuit 1 is switched interlockingly so as to select the same circuit as by the 1st changeover circuit 27. The interlocking changeover is implemented by using a switching signal 2.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
